

RUDRESH VASANTH P

SOFTWARE DEVELOPMENT ENGINEER

☎ +91-9514517883 ✉ rudreshvasanth7@gmail.com 🔗 [linkedin.com/in/rudresh-vasanth](https://www.linkedin.com/in/rudresh-vasanth)

Summary

Software Development Engineer with 1+ year of hands-on experience building and deploying full-stack applications using React, Flask, and Google Cloud Platform. Skilled in designing scalable REST APIs, developing AI agents with LLMs, and delivering automation solutions focused on clean architecture and performance optimization.

Skills

Programming Languages: Python, JavaScript, SQL

Frontend: React JS, HTML, CSS, Tailwind CSS

Backend: Flask, Node JS (Express JS), REST API Development (RESTful APIs)

AI & LLM Tools: Vertex AI, Large Language Models (LLMs), Google Agent Development Kit (ADK)

Databases: MySQL, PostgreSQL, Cloud SQL, Firestore, BigQuery

Data Engineering & Automation: ETL Pipelines, Apache Airflow, n8n

Cloud & DevOps: Google Cloud Platform (Cloud Run, Cloud Storage), Docker, GitHub

Experience

Squareshift Technologies

Mar 2025 – Mar 2026

Software Development Engineer

- Architected and maintained full-stack internal platforms using React, Flask, REST APIs, and PostgreSQL, delivering end-to-end features across database integration and responsive UI for **100+** users on GCP.
- Developed AI agents using Google Agent Development Kit (ADK), automating intelligent workflows that reduced repetitive manual tasks by **35%** and improved decision accuracy.
- Reduced manual benchmarking effort by **40%** by engineering an AI-driven automation workflow using n8n to analyze website content, generate context-aware search queries, and deliver automated HTML reports.
- Designed and orchestrated scalable ETL pipelines using Apache Airflow on Google Cloud Platform (GCP), automating end-to-end data processing workflows and reducing manual data handling by **30%**.

Projects

Productivity App (Employee Management System) | React JS, Flask, PostgreSQL, GCP

Sep 2025 – Nov 2025

- Architected and deployed a production-grade full-stack Employee Management System using React JS, Flask, and PostgreSQL, delivering end-to-end HR functionality for **100+ internal users** across a 2-month onsite build phase in Singapore.
- Engineered secure SSO-based authentication and Role-Based Access Control (RBAC), alongside core HR modules including KRA tracking, skills management, and project allocation, improving operational efficiency by **40%**.
- Containerized and deployed scalable microservices using Docker on Google Cloud Run with Cloud SQL (PostgreSQL), enabling zero-downtime deployments and ensuring **99.9% uptime** across all production services.

Operative | React JS, TypeScript, Looker SDK

May 2025 – Aug 2025

- Integrated Looker SDK into a React JS and TypeScript-based analytics platform, enabling embedded Business Intelligence (BI) capabilities and supporting **5+ client-specific** reporting workflows.
- Designed and developed custom reports and dynamic forms using Looker custom_viz, translating complex business requirements into structured analytics workflows and improving reporting accuracy by **25%**.
- Identified and resolved critical bugs in embedded visualizations and form interactions, improving data validation reliability and reducing data discrepancy issues by **30%** across client dashboards.

Awards & Certifications

- **Google Cloud Certified Professional Data Engineer** [Credential] – Gained hands-on knowledge in designing scalable data pipelines, ETL workflows, and data processing systems on Google Cloud Platform (GCP).
- **Warrior Award – Squareshift Technologies (Jan 2026):** Recognized for execution excellence, relentless commitment, and delivering high-impact solutions with sustained high performance.

Education

B.Tech. Information Technology

Velammal Institute of Technology, Thiruvallur

Graduated: 2025

CGPA: 8.75 / 10
